W. Williams was to ing was said about offering me the department of agriculture under be transferred from this State. To Commissioner Watson.

the following appropriations:

Direct appropriation about \$19,-

About \$20,000 is received from the feed stuffs stamps. This work employs about ten men, including inspectors and chemists.

The legislature appropriates \$10, 000 for the United States farm demfrom the national department of agriculture. The State aid is included in the direct appropriation.

There are employed in this feature of the work a State agent, two district agents and more than 40 county agents. The county agents come under the direct supervision of the State agent and also come in direct contact with more people in the State than any other class of representatives of the State department.

There is also an appropriation of \$3,000 for corn breeding work, which is expended under the direct supervision of the commissioner of agriculture and two other members of a commission provided by the act.

During the past several weeks Commissioner Watson has been very active in his work to help the farmers of the State and the South to devise some plan or means whereby the situation with reference to low priced cotton might be relieved. Early in erything that is done there is open cotton growers and business men in public files, there are no secrets from Montgomery, Ala., and was elected the newspapers. president of the Southern Cotton con-
